SUMMER TRAININGS

GeeksForGeeks – Java with DSA

June 2024 - August 2024

- *ADAPTIVE PROBLEM SOLVER*
  - **During my summer training, I developed a Binary Tree Visualization tool, where I explored tree traversal techniques (inorder, preorder, and postorder), recursion, dynamic data structure representation, and interactive UI design for better data visualization. This project enhanced my understanding of algorithmic efficiency, data structures, and their real-world applications.**
  - **Tech stacks used**: Java Programming Language

PROJECTS

- **ProHire**:   September 2024
  Developed a dynamic Job Application Platform that allows job seekers to explore job listings, submit applications, and track their application status.
  Employers can post job openings, review applicants, and manage recruitment efficiently.
  Integrated RESTful APIs for seamless data flow between frontend and backend.
  Tech: React.js, Node.js, Express.js, MongoDB, Firebase Authentication.

- **Skillstack**:   September 2024
  Secure login and sign-up forms, allowing users to create accounts, log in, and manage their profiles.
  Password encryption and secure handling of user data for privacy.
  A search bar to allow users to quickly find courses based on keywords, categories, or topics.
  Tech: React.js, Node.js, Express.js, MongoDB, Firebase Authentication.

- **NeoBanker**:   June 2024
  Details on how users can create, update, and delete their accounts, as well as view their account details, balance, and transaction history.
